Automation & Scripting	PDQ Deploy, PowerShell, Bash
Virtualization	VMware vSphere
Monitoring & Helpdesk	ManageEngine ServiceDesk Plus, AD360
Cloud	AWS (EC2, IAM, S3)
Programming	Python
Version Control	Git
Certifications	AWS Cloud Practitioner, DevOps on AWS, Databases (Coursera)
Courses	Google Career Course – System Administration and IT Infrastructure Services, DevOps with Kubernetes, Mastering Docker

Professional Experience

Saudi Food & Drug Authority, Riyadh

Sep 2025 — Dec 2025

System Administrator Trainee

- Engineered automated software deployment for 50+ endpoints using PDQ Deploy and PowerShell, achieving 30% reduction in manual deployment time.
- Resolved 70+ Level 1 & 2 IT incidents with 95% first-contact resolution by diagnosing issues via ManageEngine ServiceDesk Plus.
- Streamlined identity management for 100+ employees by centralizing Active Directory user lifecycle and access controls.
- Maintained 99.9% availability for virtual servers through VMware vSphere configuration and maintenance.

Self-employed, Al Khobar

Jan 2017 — June 2018

Mobile Software Technician

- Diagnosed and repaired OS-level issues on various mobile devices, restoring full functionality and ensuring client satisfaction
- Performed firmware updates and OS restoration, extending device lifespan and improving performance
- Communicated technical solutions clearly to clients, demonstrating patience and customer-focused approach
- Developed strong troubleshooting and problem-solving skills across multiple device platforms

Technical Projects

Kubernetes Cluster Deployment

- Set up and configured a multi-node Kubernetes cluster for container orchestration and management.
- Managed cluster nodes, networking, and security policies to ensure reliable application deployment.
- Configured health checks, resource limits, and auto-scaling to maintain 99.9% application availability.

Personal Portfolio

GitHub Link: falhuz.github.io/portfolio.html

- Designed and built a self-hosted professional portfolio website using HTML, CSS, and JavaScript. Deployed via GitHub Pages to showcase technical projects and establish an online professional presence.

Education

Bachelor of Computer Science

June 2019 — Jan 2026

Taif University

- Relevant coursework includes Web Development, Database Systems, Machine Learning, Data Structures, and Algorithms.
