PROFESSIONAL SUMMARY

Computer Science graduate and emerging IT professional with hands-on enterprise experience in systems and application support at the Saudi Food & Drug Authority (SFDA). Proven ability to leverage scripting, root-cause analysis, and infrastructure management to troubleshoot complex incidents, automate IT operations, and ensure high system availability. Bridging the gap between technical execution and business continuity to deliver indispensable value in Application Support, Systems Engineering, or Information Systems Analyst roles.

CORE COMPETENCIES & TECH STACK

Systems & Infrastructure: Windows Server, Active Directory (AD DS), Group Policy (GPO), DNS, DHCP, TCP/IP, VMware vSphere, VirtualBox.

Support & Operations: Incident Troubleshooting, Root Cause Analysis (RCA), System Monitoring, Enterprise Patch Management (PDQ Deploy), IT Operations.

Scripting & Databases: PowerShell, Bash, SQL, Database Validation, Git & GitHub, CSV Data Processing.

Cloud & Security: AWS Fundamentals, Identity & Access Management (IAM), Endpoint Security, ISO 9001 Compliance.

PROFESSIONAL EXPERIENCE

Saudi Food & Drug Authority (SFDA) System Administrator (Traineeship)

Sep 2025 – Dec 2025

- **Engineered IT Automation:** Developed PowerShell scripts to automate bulk Active Directory user provisioning via CSV, successfully automating 50+ accounts and enforcing secure first-logon password policies.
- **Ensured System Availability:** Monitored application and server performance across Windows Server and VMware vSphere environments, conducting proactive health checks to maintain enterprise stability and minimize downtime.
- **Resolved Complex Incidents:** Troubleshot server, workstation, and network incidents using structured root-cause analysis (RCA), effectively resolving issues and escalating complex matters to senior engineers with detailed diagnostic data.
- **Strengthened Enterprise Security:** Administered AD Organizational Units (OUs), GPOs, and account policies; implemented Software Restriction Policies to prevent unauthorized application execution and ensure compliance.
- **Optimized IT Operations:** Maintained critical network services (DNS, DHCP) and assisted in enterprise patch deployment using PDQ Deploy to keep systems secure and up-to-date.
- **Created Knowledge Capital:** Authored comprehensive technical documentation detailing incident resolutions and troubleshooting procedures to accelerate future incident response times.

KEY ACHIEVEMENTS

- **Automated Identity Lifecycle:** Architected a PowerShell-driven solution for AD DS that automated user creation, OU assignment, and authentication testing, proving scalability for enterprise onboarding.
- **Enhanced Security Posture:** Spearheaded AD security improvements by restructuring OUs and deploying stringent GPO configurations, aligning endpoint security with organizational policies.
- **Validated Network Troubleshooting:** Built an enterprise Windows Server lab from scratch, successfully diagnosing and resolving IP configuration and host unreachable issues, validating end-to-end domain communications.

TECHNICAL PROJECTS

Active Directory Group Policy & Security Administration

Tech: Windows Server 2022, AD, GPMC

- Designed and configured OUs mirroring organizational structure, successfully linking GPOs to enforce administrative restrictions and account security policies on domain-joined clients.

Windows Server Infrastructure & Network Troubleshooting Lab

Tech: Windows Server 2022, AD DS, DNS, DHCP, TCP/IP, VirtualBox

- Architected a simulated enterprise environment; configured domain services and validated communication between Windows Server and clients, resolving Layer 2/3 connectivity issues.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science | Taif University

AWS Certified Cloud Practitioner | Amazon Web Services

ISO 9001:2015 Lead Auditor Training | TVTC Approved

Google Cybersecurity Professional Certificate | In Progress
